By DU OTHY DIX.

A good, thrifty, industrious, devoted woman of my acquaintance has the misfortune to be married to a man who has a perpetual grouch. The man is one of those domestic wef blankets who can beat any patent fire extinguisher in putting out the fire on the heartistone of a home. The very sound of his key in the lock sends the temperature of the house down to the freezing point, and rubs the smile off of every lip.

Nothing that this man's wife does ever pleases him, although she is an excellent cook and a wonderful manager, and no man comes home at night to a cleaner house or a better dinner.

He growls like a dog over his food. He growls when his wife is forced to ask him for the necessary money for daily expenses. He growls at the children, and the makes the home so disagreeable by his surliness that all of the woman's old friends have dropped away, from her, and the care in their husbands.

Many men feel that the fact that they provide their wives with a home and clothes and food gives them a perfect right to be as disagreeable as they please and to shower upon the poor wretches who are married to them all the temper and tyranny and meanness that they are a plague spot.
